How to Care for Your Home Guard Entry Door System...

Paint Finish

Your Factory applied paint finish is among the most durable applied. To clean, simply use a mild soap and water, mix in bucket (do not apply soap directly to entry surface) and lightly wipe with a soft towel or sponge. If finish is scratched or chipped, clean as recommended above and use the touch up sent with the unit.

Glass Care

DO NOT SPRAY anything directly on the glass to avoid overspray on to finished surfaces. Spray into soft cloth then wipe on glass.

Caution:

DO NOT USE any alcohol, vinegar, petroleum-based chemicals, kerosene, gasoline, lacquer thinner, paint thinners or any other harsh chemicals to clean the surface of any component of your HGI Entry Door system.
